Graham Packaging Releases 2018 Sustainability Report

Company outlines global initiatives to help minimize waste.

[Graham Packaging](#), a global leader in the design and manufacturing of innovative and sustainable plastic packaging solutions, announces the release of its 2018 Annual Sustainability Report. Included in the report is a comprehensive overview of the company's commitment to helping create a circular economy, which aims to minimize waste through the use of available resources.

“We understand the ubiquitous role plastic plays in the daily lives of consumers. As leaders in the plastic packaging industry, Graham Packaging has always been driven to find sustainable solutions for our customers,” said Mike King, chief executive officer, Graham Packaging. “This report shines a light on our company's legacy of innovation while offering a glimpse into our roadmap for delivering innovative, sustainable packaging solutions to markets we serve around the world.”

By signing the pledge, the company committed to making its full line of packaging 100% recyclable, reusable or compostable by 2025. Included in this effort are initiatives such as designing for recyclability, acquiring and introducing more recycled content into products and reducing the barriers to recyclability through the use of bio-based and chemically recycled plastics.

The report also outlines other Graham Packaging sustainability efforts, including minimizing water and energy use in its plants, reducing the carbon footprint by lightweighting products and through its ongoing commitment to increase the recycling infrastructure.
