

Environmental Policy

Graham Packaging is committed to building a sustainable future for all. At the core of that commitment is that we are a People, Planet and Values-Focused company. It is Graham Packaging's responsibility to operate worldwide in an environmentally conscious manner which protects and enriches our natural environment and local communities while also improving operational efficiency in our facilities. We are building a sustainable future through sincere environmental stewardship.

At Graham Packaging:

- We actively take steps to mitigate climate change. We are committed to reducing greenhouse gas emissions (GHG) and lessening our impact on climate change through aligning with the science of climate change.
- We contribute towards the achievement of a circular economy for rigid plastics by minimizing waste, developing fully recyclable products, and incorporating higher levels of post-consumer plastics.
- We assess the potential risks and impacts on biodiversity as a result of our activities in areas we have operations in and consider actions to avoid and mitigate adverse impacts.
- We are dedicated to pollution prevention and protecting the environment through the elimination of process upsets, continuous employee diligence, and process improvements.
- We are continuously seeking new and innovative ways to improve our environmental performance especially as they pertain to energy efficiency, waste reduction, water stewardship and air quality.
- We comply with all levels of environmental compliance requirements at our facilities which includes obtaining proper permitting, performing required inspections and sampling, and completing routine environmental reports as required.
- We assign environmental champions at each plant to properly execute and lead our company's designated environmental objectives.
- We train all employees on the requirements of our environmental management system.
- We measure and assess our environmental performance and are open and transparent on communications as it pertains to these areas of our operations.

Driving progress towards achieving circular economy, mitigating climate change, addressing any impacts on biodiversity and ensuring environmental compliance is everyone's responsibility. Graham Packaging expects that every employee will join in our environmental sustainability efforts on a continuous day-to-day basis. Only through the dedication and efforts of all individuals can Graham Packaging achieve this goal.
